

EDUCATION

- **College of Engineering Trivandrum (CET)** Thiruvananthapuram, India
Post Graduation; Masters in Computer Application
August. 2017 – April. 2020
- **Christ Nagar College** Thiruvananthapuram, India
Graduation; Bachelor in Computer Application
June. 2014 – May. 2017
- **K.V A.F.S Akkulam** Thiruvananthapuram, India
High School; Computer Science
April. 2012 – March. 2014

EXPERIENCE

- **IoT Lab** CET, Thiruvananthapuram
Student faculty
2017 - Present
 - **Arduino UNO:** The Arduino UNO is an open-source micro-controller board based on the Microchip ATmega328P micro-controller and developed by Arduino.cc. As a member of student faculty, I was given the chance to take classes on Arduino UNO to the students of my college.
 - **Raspberry Pi:** The Raspberry Pi is a tiny and affordable computer that you can use to learn programming through fun, practical projects. I took workshops on Raspberry Pi.
- **Appfabs PVT LTD** Thiruvananthapuram, India
Intern
May 2018 - September 2018
 - **Cyber security:** Cybersecurity is the protection of internet-connected systems, including hardware, software and data, from cyberattacks. In a computing context, security comprises cybersecurity and physical security – both are used by enterprises to protect against unauthorised access to data centres and other computerised systems.

PROGRAMMING SKILLS

- **Languages:** Embedded C, Python, Bash Script
- **Technologies:** Git, Docker

WORKSHOPS TAKEN

- **Raspberry Pi Workshop** CET, Thiruvananthapuram
IOT Lab
2018
 - **Python:** This workshop was conducted by a team of 4 students including me. I took the python session in the workshop.
- **Beaglebone Workshop** CET, Thiruvananthapuram
IOT Lab
2018
 - **Linux and Python:** This workshop was conducted by a team of 4 students including me. I took the Linux session and Python session in the workshop.
- **Raspberry Pi Workshop** CET, Thiruvananthapuram
Drishti
2018
 - **Pi:** This workshop was conducted for Drishti (Technical Fest). The session included about Raspberry Pi, Linux, working remotely, Python, creating Pi server and home automation using Pi.
- **Git Workshop** Muthoot Institute of Technology and Science, Kochi
2019
 - **Git:** In this workshop, I took session on Git and Github.

CONTRIBUTED PROJECTS

- **Python Fingerprint Recognition:** In this project I have fixed the python errors due to which the program doesn't run. Parent project-<https://github.com/kjanko/python-fingerprint-recognition>. My project-<https://github.com/sashuu6/python-fingerprint-recognition>.

MY PROJECTS

- **3-factor-authenticated-door-lock:** A 3 factor authenticated door lock using Atmega328p, 74HC595 multiplexer, key switch, keypad and RFID. The project is available at <https://github.com/sashuu6/3-factor-authenticated-door-lock>.
- **digital-clock-with-birthday-alarm:** The digital clock with birthday alarm is a DIY alarm built using Arduino UNO, Adafruit OLED and DS 3231 RTC module. The project is available at <https://github.com/sashuu6/digital-clock-with-birthday-alarm>.
- **youtube-sub-count:** The 'Youtube Subscriber and View Counter' is a device made using NodeMCU (ESP8266) and OLED display. You can use this device to view your youtube's subscriber and view count. The project is available at <https://github.com/sashuu6/youtube-sub-count>.
- **simple-home-automation:** A simple home automation using Raspberry Pi Zero W, Particle.io, Google assistant and IFTTT. The project is available at <https://github.com/sashuu6/simple-home-automation>.
- **vOne:** My version of Arduino Uno for board isolation. The project is available at <https://github.com/sashuu6/vOne>.
