

## EDUCATION

---

- **College of Engineering Trivandrum (CET)** Thiruvananthapuram, India  
*Post Graduation; Master in Computer Application* *August. 2017 – April. 2020*
- **Christ Nagar College** Thiruvananthapuram, India  
*Graduation; Bachelor in Computer Application* *June. 2014 – May. 2017*
- **K.V A.F.S Akkulam** Thiruvananthapuram, India  
*High School; Computer Science* *April. 2012 – March. 2014*

## EXPERIENCE

---

- **IoT Lab** CET, Thiruvananthapuram  
*Student faculty* *2017 - Present*
  - **Arduino UNO:** The Arduino UNO is an open-source microcontroller board based on the Microchip ATmega328P microcontroller and developed by Arduino.cc. As a member of student faculty, I was given the chance to take classes on Arduino UNO to the students of my college.
  - **Raspberry Pi:** The Raspberry Pi is a tiny and affordable computer that you can use to learn programming through fun, practical projects. I took workshops on Raspberry Pi.
- **Appfabs PVT LTD** Thiruvananthapuram, India  
*Intern* *May 2018 - September 2018*
  - **Cyber security:** Cybersecurity is the protection of internet-connected systems, including hardware, software and data, from cyberattacks. In a computing context, security comprises cybersecurity and physical security – both are used by enterprises to protect against unauthorized access to data centers and other computerized systems.

## PROJECTS

---

- **3-factor-authenticated-door-lock:** A 3 factor authenticated door lock using Atmega328p, 74HC595 multiplexer, key switch, keypad and RFID. The project is available at <https://github.com/sashuu6/3-factor-authenticated-door-lock>.
- **digital-clock-with-birthday-alarm:** The digital clock with birthday alarm is a DIY alarm built using Arduino UNO, Adafruit OLED and DS 3231 RTC module. The project is available at <https://github.com/sashuu6/digital-clock-with-birthday-alarm>.
- **youtube-sub-count:** The 'Youtube Subscriber and View Counter' is a device made using NodeMCU (ESP8266) and OLED display. You can use this device to view your youtube's subscriber and view count. The project is available at <https://github.com/sashuu6/youtube-sub-count>.
- **simple-home-automation:** A simple home automation using Raspberry Pi Zero W, Particle.io, Google assistant and IFTTT. The project is available at <https://github.com/sashuu6/simple-home-automation>.
- **vOne:** My version of Arduino Uno for board isolation. The project is available at <https://github.com/sashuu6/vOne>.

## PROGRAMMING SKILLS

---

- **Languages:** Embedded C, Python, Bash Script **Technologies:** Docker
